Project Name	DocSpot : Seamless Appointment Booking for Health

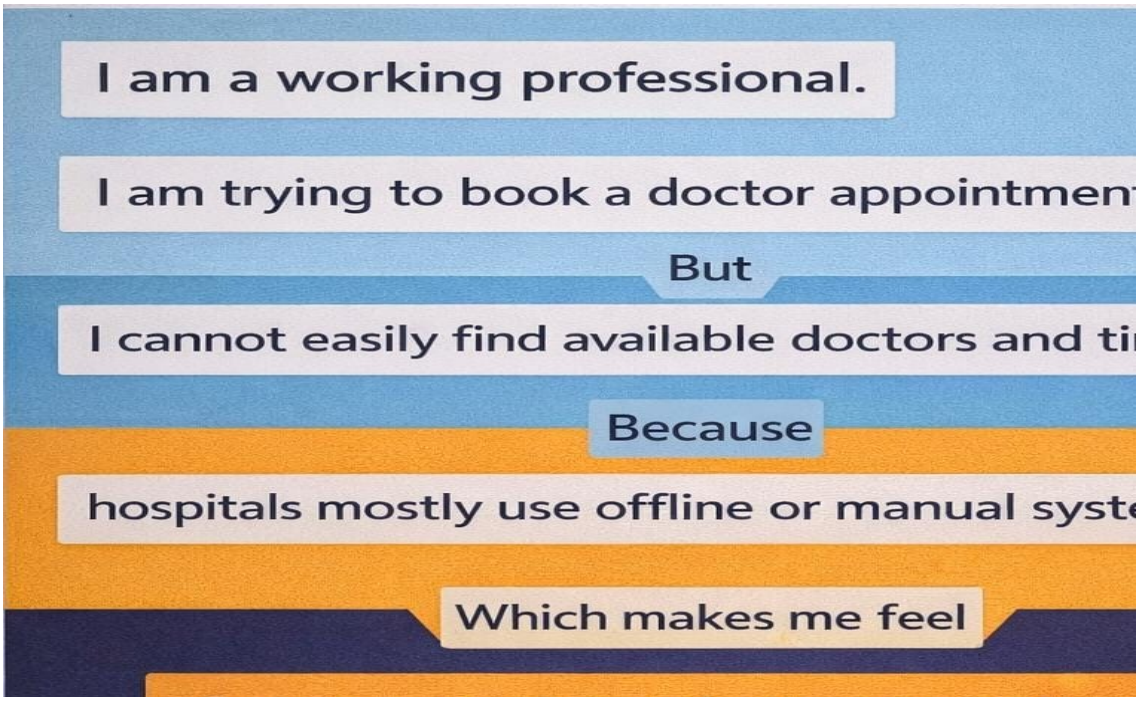
Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:



Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	I am a working professional.	I am trying to book a doctor appointment quickly.	But I cannot easily find available doctors and timings.	Because hospitals mostly use offline or manual systems.	Which makes me feel frustrated and stressed.
PS-2	I am a patient.	I am trying to manage my appointment history.	But I don't get proper updates or reminders.	Because there is no centralized booking platform.	Which makes me feel confused and anxious.

Define the Problem (From User Perspective):

Many patients face difficulty in booking doctor appointments due to:

Manual booking systems

Long waiting queues

No real-time status updates

No centralized platform

Poor communication between doctor and patient

Hence, a web-based doctor appointment booking system is required
