| Team ID | LTVIP2026TMIDS69451 |
| Project Name | DocSpot : Seamless Appointment Booking for Health |

**Proposed Solution Template:**

Project team shall fill the following information in the proposed solution template.

| S.No. | Parameter | Description |
|---|---|---|
| 1. | Problem Statement (Problem to be solved) | Patients face long waiting times, difficulty in finding available doctors, manual booking issues, lack of appointment tracking, and no real-time updates. Hospitals also struggle with appointment management and data organization. |
| 2. | Idea / Solution description | Develop a web-based Doctor Appointment Booking System that allows users to register, search doctors, book appointments, upload medical documents, and track appointment status. The system includes separate dashboards for Admin, Doctors, and Users with secure authentication. |
| 3. | Novelty / Uniqueness | Role-based access system (Admin/Doctor/User), secure JWT authentication, digital document upload feature, centralized database management, and real-time appointment status tracking in one integrated platform. |
| 4. | Social Impact / Customer Satisfaction | Reduces hospital waiting time, improves healthcare accessibility, increases transparency, enhances patient convenience, and builds trust through organized digital records. |
| 5. | Business Model (Revenue Model) | Commission per booking, premium doctor listing, hospital subscription plans, future online consultation charges, and advertisement opportunities. |
| 6. | Scalability of the Solution | Can be expanded to multiple hospitals and cities, mobile app integration, online payment gateway integration, telemedicine features, AI-based doctor recommendations, and cloud-based scaling for large user traffic. |
