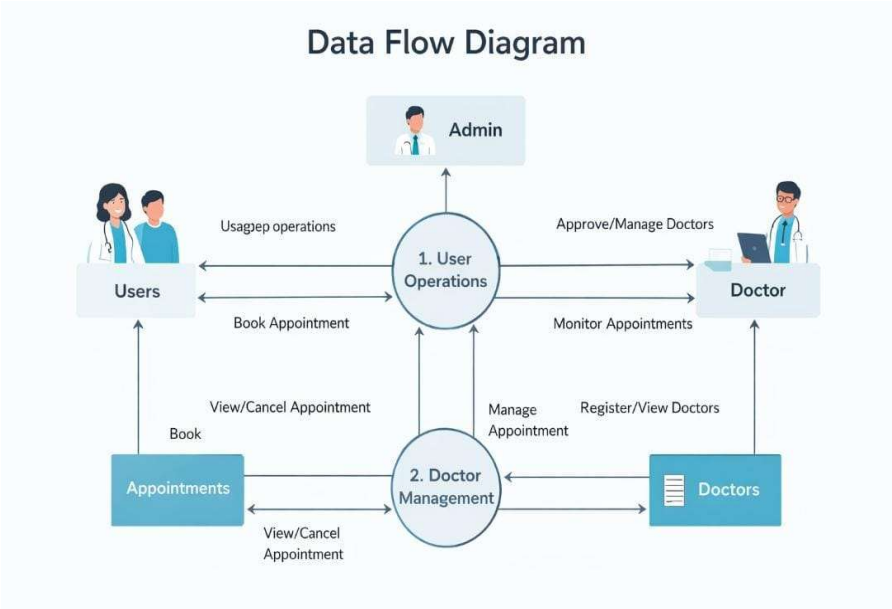
Project Design Phase-II
Data Flow Diagram & User Stories

Date	21 February 2026
Team ID	LTVIP2026TMIDS69451
Project Name	DocSpot : Seamless Appointment Booking for Health

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified)



- Shows data flow between User, Doctor, and Admin.
- Uses modules to process and store data in databases.
- Explains how appointments are booked and managed.

User Stories

Use the below template to list all the user stories for the product.

User Stories

	A	B	C	D	E	F
1	User Type	Epic / Module	User Story ID	User Story	Acceptance C	Priority
